

# Emergency Response Go-Kits

7 September 2023  
Jim Oberhofer KN6PE

Cupertino ARES/RACES

# CARES mission

---

The mission of Cupertino ARES is to maintain and train Amateur Radio volunteers capable of providing professional emergency communications, increasing the City's emergency response effectiveness, and speeding the recovery effort.

# You just were activated... now what!?!

---

In Cupertino, we may be responding to any of the following:

- Earthquakes
- Flooding by dam failure
- Flooding by rain
- Wild land or large urban fire
- Manmade disasters (BNICE)
- Missing Person(s)

Each of these events has a different communications needs and expectations on how we perform.

So, how do we prepare?

# Types of Assignments

---

As an CARES Field Responder, you may be asked to assist with any of a number of assignments, from a variety of station operating locations, such as:

## **Base Station**

- Emergency Operations Center / Comm 469
- County Fire Stations
- From Home (Message Net)

## **Field-Portable Station**

- Incident Command Post (ARKs, Staging Areas, etc.)
- Search and Rescue Field support
- Community Access Point (911 call taking)
- Shelter

## **Mobile Station**

- Mobile Command Post
- Shadow
- Vehicle Ride-Along (Public Works, Logistics, etc.)
- Cross-band Repeat Station Control Operator

# Length of Assignments

---

The length of time you are asked to assist with emergency communications will depend on the type and size of the incident and the number of Field Responders available:

- One Operational Period – a few hours to less than a day
- Overnight
- Two to three days (Shifts over several days)
- Long-Duration – greater than 72 hours (MAC Response)

The longer the assignment, the more we need to bring to the event.

# What is a Go-Kit?

---

- A Go-Kit is a previously identified collection of equipment and personal gear that you will need to perform your duties as an Emergency Communicator in the event of an activation.
- Your Go-Kit should be tailored to your needs, your equipment, expected assignments, and expected length of assignments.

# What is a Go-Kit?

---

## Why do you need one?

- In the event of a major disaster, your assignment location will probably be without power, heat, water, and telephone service. Most businesses in the area will probably not be open due to the emergency.
- As a Field Responder, YOU must provide your own equipment and gear.
- You are responsible for your own safety, and you must provide for your own welfare and comfort.

## Building your Go-Kit now ensures:

- The items you need are available when you need them.
- The items you need are where you expect them to be.
- When the Activation Call comes, you won't have time to hunt for things!

Adapted with permission from Dan O'Connor, KE7HLR

Cupertino ARES/RACES

# Types of Go-Kits

---

Your Go-Kit should be tailored to your needs, your equipment, your expected assignments, and the expected length of assignments. Go-Kits should be broken-up into different types of kits, depending on function and location:

## Go-Kits by Function

- Types of Incident
- Type of Assignment or Mission
- Length of Assignment

## Go-Kits by Location

- Carried on Person
- Carried in Vehicle
- Stored at Fixed Location (Home, Office, Shop, etc.)
- Non-Cached Equipment—gathered as needed (Home, Office, Shop, etc.)

Adapted with permission from Dan O'Connor, KE7HLR

Cupertino ARES/RACES

# Think Modular

---

## Basic Go-Kits

- 2 Hour Kit - kept nearby at all times for immediate (within minutes) communication of damage reports during an initial activation.
- 12-Hour Kit – For one operational period; for fully independent operation; unknown environment (heat, cold, wind, rain); unknown time (day, night, up to 12 hours). Return home to retrieve.
- Extended Kit – Additional items for fully independent operation over an extended period of time.

# CARES Basic Go-Kit

## Cupertino ARES/RACES Field Communications Handbook

- These are specific requirements for a Cupertino deployment by CARES members.
- See the County RACES Go-Kit, a requirement for Type IV credentials.

### 10 Minimum Field Deployment Equipment (Go-Kit)

Purpose: Fully independent operation, Cupertino ARK or environment (heat, cold, wind, rain), unknown time of day. You must have the following to participate in a CARES field deployment.

**UPDATED  
For 2024**

#### Equipment – REQUIRED

1.	2m/440 HT	
2.	Radio user manual or cheat-sheet	
3.	Ear bud or headphones	
4.	Charged batteries or extra batteries for 12 hours operation	
5.	Mobile antenna (mag mount or existing mobile antenna)	
6.	Power cord adaptors, Cigarette lighter adaptor	
7.	Spare Fuses	
8.	Coax adaptors (connect HT to coax)	
9.	Notepad, pens	
10.	Clipboard (covered recommended)	
11.	Cell phone and charger, cigarette lighter adaptor	

#### Documentation, Identification – REQUIRED

12.	Amateur radio license	
13.	CA driver's license or CA-issued ID card	
14.	City of Cupertino Identification Badge	
15.	Cupertino City Map, County Grid; off-line maps OK	

#### Forms – REQUIRED (<http://www.cupertinoares.org/ccc/forms/>)

16.	ICS 211 Check-in Log	
17.	ICS 214 Unit Log	
18.	ICS 213 Message Forms, Short Form	
19.	ICS 309 Communications Log	
20.	COES 105 Preliminary Safety Assessment Form, Field	

#### Personal Gear – REQUIRED

21.	Watch or clock	
22.	Flashlight, headlamp, spare batteries for 12 hours	
23.	Safety vest, ANSI standard, City-issued	
24.	Long pants	
25.	Sturdy closed-toe shoes	

#### Personal Gear – Recommended

(Some of the following items may be REQUIRED depending on the assignment)

26.	Fueled vehicle (always keep your fuel tank at least 1/2 full)	
27.	Hat (broad-brim recommended)	
28.	Seasonal jacket / rain gear	
29.	Leather Gloves, Eye Protection	
30.	Food for 12 hours, water for 12 hours	
31.	First Aid Kit	
32.	N95 breathing mask	
33.	Compass (Ember Watch)	
34.	Whistle	
35.	FRS/GMRS radio

34. Whistle	
35. FRS/GMRS radio	

# Why Power Adapters?

---

## Notes

1. Operating in the field during an emergency is all about power management.
2. Batteries are important and important to any go-kit.
3. Ensuring you can **charge** your equipment is critical.
4. Battery power can come from different sources --- your car, gel cell, LiFePO4 batteries, etc.
5. *Anderson Powerpoles* are the power interconnect standard we use for our 12vdc equipment.

# Power Adapters

## Basics

---

### Getting to the source... Vehicle power plug

# Power Adapters

## Basics

### Getting to the source... Battery terminals

**Battery clamps  
with Powerpoles**

**Car Accessory socket  
with Powerpoles**

**Car Accessory Plug  
with radio power connector**

**Cell Phone USB  
Charge connector**

# Power Adapters

## Basics

---

### Do you Build or Buy?

#### Consider building if...

- This is a good use of your hobby time.
- You like tinkering and learning, working with your hands.
- You get satisfaction from using something that you built.
- What you need is something custom to your situation.
- You are cost sensitive.

#### Consider buying if...

- What you need is inexpensive and readily available.
- You have limited time to figure things out.
- You do not have the material or tools to build things.
- Any *flavor* of the item will do.
- Cost is not a concern.

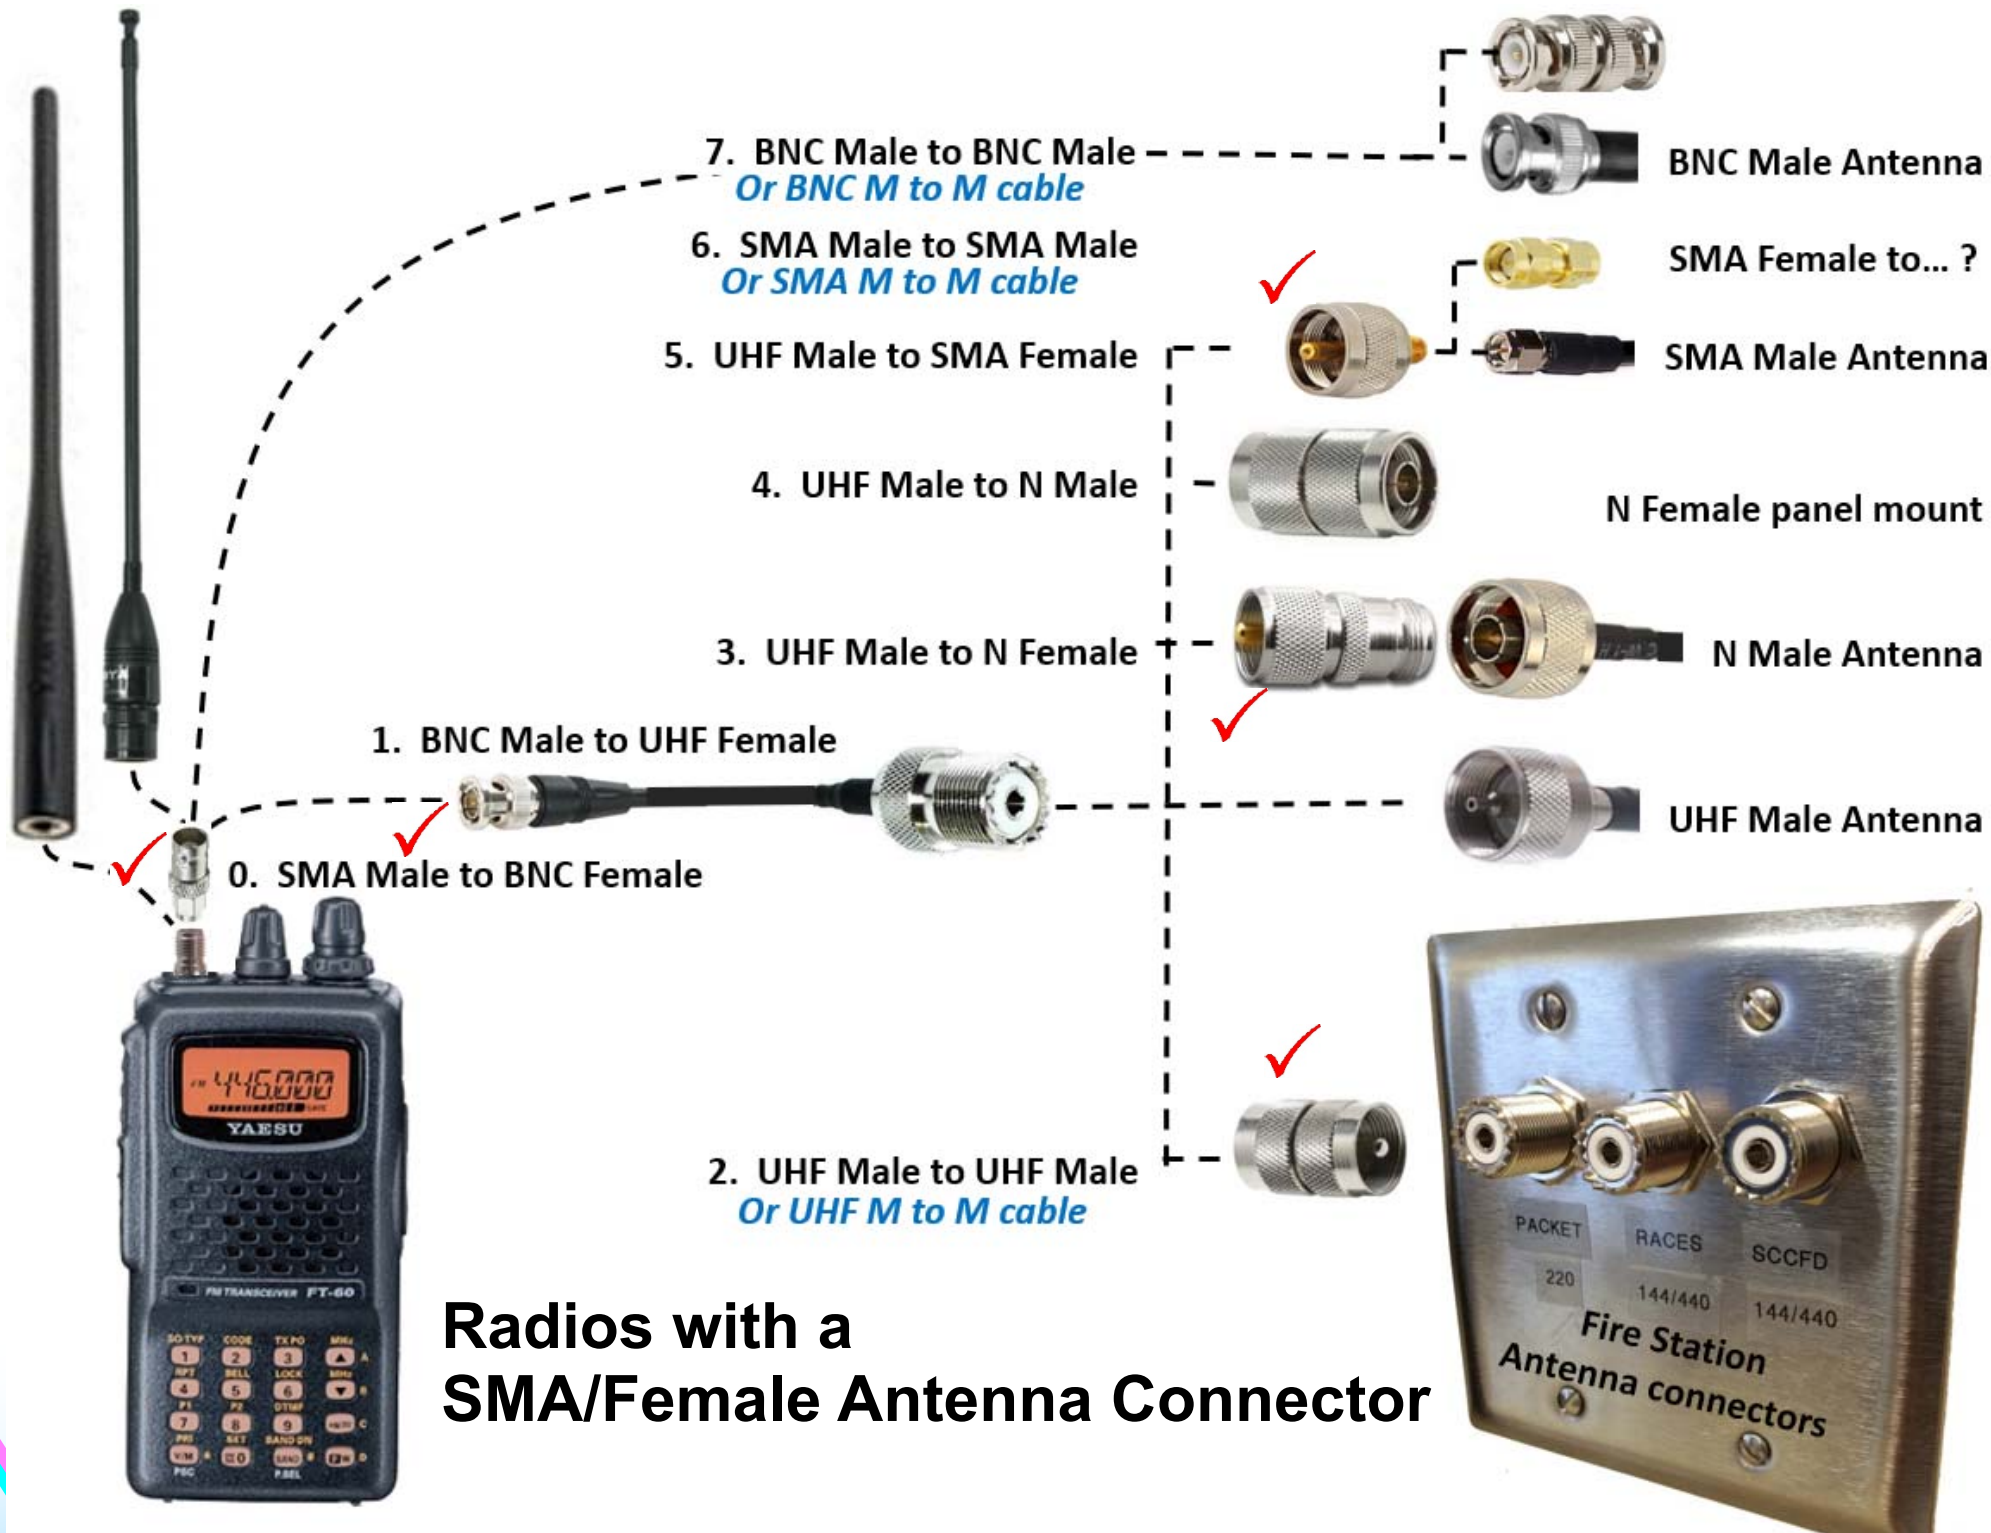

# Why Coax Adapters?

---

## Notes

1. Most HT radios are built with one of 2 connectors:
  - BNC/Female
  - SMA/Female (!)
2. The most common antenna coax connector is a UHF/Male PL259 connector.
3. Sooner or later, you may need to connect your HT to an antenna other than your stock HT antenna.
4. Getting a collection of the coax adapters now will ensure no surprises in the field later!

## Radios with a SMA/Female Antenna Connector

# SC County RACES Recommendation

---

## 2 Hour Carry Kit

**Purpose:** To be kept nearby at all times for immediate (within minutes) communication of damage reports during Initial Activation Operations. Also used to remain in contact with Resource Net while returning home to retrieve 12-hour Go-Kit.

## 12 Hour Go-Kit

**Purpose:** For fully independent operation; unknown environment (heat, cold, wind, rain); unknown time (day, night, up to 12 hours). Usually need to return home to retrieve.
