# After Action Report 2022 Field Day

Cupertino ARES/RACES

#### 1. Overview

<b>Description:</b>	2022 Cupertino Field Day
<b>Event Date:</b>	25-June-2022
<b>Report Date:</b>	05-July-2022
<b>CARES Event:</b>	CUP-22-32T
<b>RACES Event:</b>	CUP-22-32T
Control:	Cupertino ARES/RACES
<b>Report Revision:</b>	0.2, Draft
Submitted by:	Darryl Presley KI6LDM

#### **Requirements for Reporting**

Completing an After-Action Report is part of the required SEMS reporting process. The Emergency Services Act, Section 8607 (f) mandates that the Office of Emergency Services (OES) in cooperation with involved state and local agencies complete an After-Action Report within 120 days after each declared disaster. Section 2450 (a) of the SEMS Regulations states that, "Any city, city and county, or county declaring a local emergency for which the governor proclaims a state of emergency, and any state agency responding to that emergency shall complete and transmit an after-action report to OES within ninety (90) days of the close of the incident period as specified in the California Code of Regulations, Title 19, s2900(q)."

CARES will follow this requirement for reporting the results and recommendations for this Training Event.

#### i. Introduction and Background

Terms

CARES:	Cupertino Amateur Radio Emergency Service, ARES/RACES organization supporting the City of Cupertino; provides backup and emergency communications to the city.
CERT	Community Emergency Response Team.
MRC	Medical Reserve Corps.
ARRL	American Radio Relay League.

#### Introduction

Field Day is an annual event sponsored by the ARRL and is intended to be an opportunity for education, practice in emergency radio operations, and public relations. Individual ARES/RACES groups participate in their own communities, and a national contest aspect to the event adds to the motivation to participate. CARES participated this year by setting up and operating personally-owned radio equipment and the CARES communications van as well as an information table and a station where members of the public could talk on a ham radio. CARES participation lasted from 8:00 a.m. until 4:00 p.m. Members of the city government, served agencies of CARES, and

ARRL section officials were invited to visit during the event. The City of Cupertino authorized the event under training activation number CUP-22-32T.

Due to the global pandemic, CARES did not hold their Field Day event at a public location for two years (2020 and 2021) but did participate virtually. All CARES members who participated did so from their homes. This year – 2022, CARES did hold the event at Memorial Park for the public to visit.

## ii. Type / Location of Event / Drill / Exercise

Event Type:City of Cupertino, CARES Training ActivationEvent Identifier:CUP-22-32TEvent Name:CARES / ARRL Field DayLocation:City of Cupertino Quinlan Community Center / Memorial Park

## iii. Description of the Event / Drill / Exercise

CARES event objectives:

- 1. Practice off-the-grid field deployment.
- 2. Practice HF, VHF/UHF, packet and digital operations.
- 3. Practice with and educate each other about various other radio equipment and technologies.
- 4. Meet informally with representatives of some of CARES' served agencies and ARRL officials.
- 5. Educate the public and city officials about CARES, Cupertino Citizen Corps, and emergency preparedness.

Event resources came from the following organizations:

- 1. Cupertino ARES/RACES: Twelve (12) CARES members participated in the event.
- 2. Others: The following individuals visited during the event.
  - Mayor, City of Cupertino
  - Vice Mayor, City of Cupertino
  - Cupertino OES
  - OES Director, Los Altos
  - Santa Clara County Fire

## Performance against Objectives:

## 1. Practice off-the-grid field deployment

Results: **SATISFACTORY**. The event was held outdoors, with all equipment being powered by generators, batteries, and solar panel. CARES members brought and deployed their own equipment, including three HF stations and antennas, a 30-foot antenna mast, hex beam antenna, and two packet stations. The CARES communications van 469 was also deployed, as were city-owned generators and tents.

## 2. Practice HF operations

Results: **SATISFACTORY**. CARES operators practiced at making contest contacts with good success, with reasonably good band propagation on 20m that day. A Near Vertical Incidence Skywave (NVIS) antenna was set up to demonstrate communications in the 100- to 400-mile range.

<u>3. Practice with and educate each other about various other radio equipment and technologies</u> Results: **SATISFACTORY**. CARES members gave demos and shared knowledge radio direction finding via fox hunt, HF operations, digital operations, and using an antenna analyzer.

<u>4. Meet informally with representatives of some of CARES' served agencies and ARRL officials</u> Results: **SATISFACTORY**.

• Emergency Planner, Cupertino OES

• Santa Clara County Fire

5. Educate the public and city officials about CARES, Cupertino Citizen Corps, and emergency preparedness Results: **SATISFACTORY**. The event was held in a public park part of the Quinlan Community Center, so it was visible and accessible to the public.

- CARES members staffed an information booth, answering questions and handing out brochures on CARES, CERT, MRC, ARRL, emergency preparedness, the role of amateur radio in emergencies, and more. 19 people signed the visitor's log.
- CARES members staffed a Get-On-The-Air station where non-hams could talk on a ham radio.

# iv. Chronological Summary of Event / Drill / Exercise

CARES operated this event under activation number CUP-22-32T. The following is a summary of the event timeline. All times listed here are in local time. CARES members arrived and left throughout the day, as the event did not require all-day attendance by individual members.

Time	Description, Notes, Comments
0745	Radio equipment, antennas, transceivers, etc., arrive. Supply trailer already on site.
0800	First CARES members arrive at the site
0810	Safety briefing and planning session
0815	Members begin setting up radio equipment, tents and tables, information booth
0830	Comm Van 469 arrives at the site, other CARES members arrive
1040	Site briefing and safety checks
1100	CARES Field Day operations begin
1230	Lunch
1600	CARES operations cease, members begin taking down and putting away equipment and supplies
1700	Site is clear, all city supplies are in the trailer
1710	Communications van 469 departs
1710	City trailer departs, volunteers depart

## v. Response at SEMS Levels (as appropriate):

Not applicable

vi. Interacting Systems, Agencies, and Programs: Not applicable

## vii. Improvements, Conclusions, Recommendations:

The following is a summary of the key conclusions and recommendations.

## What worked

- Engagement with the public was good.
- Cupertino OES helped with publicity with news articles in the Cupertino media including a Cupertino 1670AM radio spot and social media.

## What didn't work / needs improvement

- The number of CARES members taking advantage of the opportunity to practice or learn HF operations was small—3 experienced HF operators and 1 member new to HF.
- Field Day has a strong focus on HF operations, though almost all of CARES training and expected emergency activities involve VHF and UHF communications, not HF.

## Recommandations

- Consider merging an annual preparedness fair with Field Day or some other related public activity as an annual event.
- Consider more promotions via various media outlets including radio, TV, Twitter, Facebook, etc.

#### viii. Logs, attachments:

None needed or required.

End of Report.
