

Drill Scenario Assignment Set

2022 Canyon Trail Fire Evacuation

Cupertino
ARES/RACES

For the purposes of this drill, the following locations are identified as possible deployment destinations. Each Field Responder will receive a written scenario sheet specific for their location that describes events that they see, simulated observations that they make, or information that is told to them. This input will form the basis for creating and passing message traffic to the EOC.

Drill Scenario #1

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Organized Neighborhood: _____
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly last night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe when you step out of your house in your neighborhood. These are things you see, things you might do, and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting Started	<ul style="list-style-type: none"> Note! All times in Column 1 are relative to when you first check in. As you step outside, it's pretty quiet in the neighborhood for a Saturday morning. The air is not as smokey as it was last night. Looking to the southwest, you can see the smoke in the distance. No sign of flames. That's always a good sign. You think back to last weekend where you had a terrific meeting with most everyone on the street about making plans for an evacuation, and hope they all at least read the CAL Fire READY, SET, GO handouts that you emailed them. And then there was the AlertSCC notice last night about a possible evacuation and what help the city needed. At the 8:30am briefing this morning, you learned that only one Cupertino Zone is set for <i>Evacuation Order</i>. Fortunately, your zone is still at <i>Evacuation Warning</i>... hopefully it will stay that way. You also wonder if everyone on the street knows what is going on right now? So, you think about your immediate next steps: <ul style="list-style-type: none"> Check into the Zone 1 ARK net, let them know you are here. Obviously, you will need help from some of your neighbors or the local emergency committee (if you have one). Assign a few people to check with everyone in the neighborhood that they are aware we are all in an <i>Evacuation Warning</i> zone, and what that means.
------------------------	--

	<ul style="list-style-type: none"> ○ Assign two people to listen to Radio Cupertino 1670 and KCBS 740 on your AM radio for city and regional information. ○ You also start to think about who is going to have problems getting out of here if we actually need to evacuate? <p>Looks like it will be a busy morning.</p>
9:45 Check in sometime over the next 15 minutes	<p>You pull out your FRS radio and wonder if Monta Vista ARK Net Control has started the net. You turn on your radio, make sure it is set for Channel 1 / 21, and listen. Yup, there they are.</p> <p>Check in. Call Net Control and check in.</p>
10:00 Send this message over the next 20 minutes	<p>Your committee just completed knocking on all doors in the neighborhood. About <pick-a-number> of them opened the door and now know the situation.</p> <p>Call Net Control and let them know <% or # houses> have been notified.</p>
10:25 Send this message over the next 20 minutes	<p><i>Pick a situation that may actually exist within your neighborhood where a resident has a <u>medical issue</u> that will complicate their ability to evacuate. If none actually exists, then get creative and make one up! You should include a description of the problem, what is needed, and the address.</i></p> <p>Call Net Control and pass on this information. Say “This is Drill Traffic”</p>
10:45 Send this message over the next 20 minutes	<p><i>Pick a situation that may actually exist within your neighborhood where a resident has a <u>mobility issue</u> that will complicate their ability to evacuate. If none actually exists, then get creative and make one up! You should include a description of the problem, what is needed, and the address.</i></p> <p>Call Net Control and pass on this information. Say “This is Drill Traffic”</p>
11:10 Send this message over the next 20 minutes	<p>The Sheriff drives by and you have a brief discussion on what’s going on. He says there is a potential that your zone will be set to <i>Evacuation Order</i> within the next 2 hours, but no final decision has been made. You decide to send runners around to your neighbors and let them know that an evacuation is now possible. Some residents elect to leave now.</p> <p>Call Net Control and pass on this information. Say “This is Drill Traffic”</p>
11:30	<p>End of the Exercise.</p> <p>Call Net Control and check out of the net.</p> <p>Please proceed to the ICP at Monta Vista Park to drop off any paperwork you may have created.</p>

Drill Scenario #2

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Monta Vista ARK
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly last night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting Started	<ul style="list-style-type: none"> With the Safety Briefing and the FRS/GMRS radio tests complete, you are ready to settle in as Zone 1 Neighborhood Net Control Operator. Looking to the southwest over the fire station, you can see the smoke in the distance. No sign of flames. That's always a good sign. After listening to the TV yesterday, you were not surprised when you received the AlertSCC notice last night about a possible evacuation and what help the city needed. At the 8:30am briefing this morning, you learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. There were several neighborhoods represented at the briefing, and no clue how many others will come on the radio as the day progresses. <p>Looks like it will be a busy morning.</p>
	See the Net Control Script for sequencing the event.
	NOTE: As a reminder, all radio traffic is DRILL TRAFFIC. Please remind all participants to state that at the end of their messages.

09:45	Open the Net. See the Net Control Script
	Take reports as they come in
10:20	For any Allied Health Facilities (Marianist Center, maybe Sunny view): Ask each of them to report two things when they can: (i) the number of residents at the facility by resident class (Independent, Assisted, and Skilled Nursing), and (ii) number of residents who need transport if an evacuation is required. They should reply within a few minutes
	Take reports as they come in
11:30	Close the Net

Drill Scenario #3

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	The Forum at Rancho San Antonio Address: 23500 Cristo Rey Dr, Cupertino, CA 95014 Contact: Phone: 650-944-0100 Residents: Independent Living # _____ Assisted Living # _____ Skilled Nursing # _____ Staffing: CARES (8 members on site) Evac Zone: CUP-E007
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly last night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe when you step out of your house in your neighborhood. These are things you see, things you might do, and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting Started	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. As you step outside, it's pretty quiet for a Saturday morning. The air is not as smokey as it was last night. Looking to the southwest, you can see the smoke in the distance. No sign of flames. That's always a good sign. After listening to the TV yesterday, you were not surprised when you received the AlertSCC notice last night about a possible evacuation and what help the city needed. You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. You also wonder if management knows what is going on right now? So, you think about your immediate next steps: <ul style="list-style-type: none"> Check into the check into the net, let them know you are here.
------------------------	---

	<ul style="list-style-type: none"> ○ Check with facilities management that they are aware we are all in an <i>Evacuation Warning</i> zone, and what that means. ○ Assign your buddy to listen to either Radio Cupertino 1670 or KCBS 740 on your AM radio for city and regional information. <p>Looks like it will be a busy morning.</p>
09:45 Send this message over the next 15 minutes	Your Tactical Call will be The Forum. Call Net Control and check in with your call sign and facility name.
10:00 Send this message over the next 20 minutes	You talked to your management and they understand that they under an Evacuation Warning. Call Net Control and let them know of your local situation.
When asked	Wait for Net Control for ask for this information. At some point, you will be asked by the Net Control for two things: (i) the number of residents at the facility by resident class (Independent, Assisted, and Skilled Nursing), and (ii) number of residents who need transport if an evacuation is required If you don't have the actual numbers, make it up. Reply to Control and pass on this information.
10:50 Send this message over the next 20 minutes	With the smoke getting heavier, your management has advised all residents to shelter in place or wear N95 or KN95 masks outside. They ask for you to check with the city for different public transport options for ambulatory, bedridden, or wheelchair residents. Put a message together and send this question to Net Control.
11:15 Send this message over the next 20 minutes	The Sheriff drives by and you have a brief discussion on what's going on. He says there is a potential that your zone will be set to <i>Evacuation Order</i> within the next 2-3 hours, but no final decision has been made. You let your management know. Some independent living residents elect to leave now. Call Net Control and pass on this information.
11:30	End of the Exercise. Call Net Control and check out of the net. Notify your management that the exercise is over and you are leaving. Please thank them for their help. Please proceed to the ICP at Monta Vista ARK to drop off any paperwork you may have created.

Drill Scenario #4

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Sunny View Retirement Address: 22445 Cupertino Rd, Cupertino, CA 95014 Contact: Phone: 408-454-5600 Residents: Independent Living # _____ Assisted Living # _____ Skilled Nursing # _____ Staffing: CARES or CAV (FRS) Evac Zone: CUP-E009
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly last night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe when you step out of your house in your neighborhood. These are things you see, things you might do, and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting Started	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. As you arrive, it's pretty quiet for a Saturday morning. The air is not as smokey as it was last night. Looking to the southwest, you can see the smoke in the distance. No sign of flames. That's always a good sign. After listening to the TV yesterday, you were not surprised when you received the AlertSCC notice last night about a possible evacuation and what help the city needed. You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. You also wonder if management knows what is going on right now? So, you think about your immediate next steps: <ul style="list-style-type: none"> Check into the check into the net, let them know you are here.

11:30	End of the Exercise. Call Net Control and check out of the net. Notify the facility management that the exercise is over and you are leaving. Please thank them for their help. Please proceed to the ICP at Monta Vista ARK to drop off any paperwork you may have created.

Drill Scenario #6

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Marianist Center Address: 22683 Alcalde Rd, Cupertino, CA 95014 Contact: Bro. Jack Somerville Phone: 408- 207-4805 Residents: Independent Living # _____ Assisted Living # _____ Skilled Nursing # _____ Staffing: Staff (GMRS, Ch 1/21) Evac Zone: CUP-E017
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly last night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe when you step out of your house in your neighborhood. These are things you see, things you might do, and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting Started	<ul style="list-style-type: none"> <i>Reminder:</i> all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. It's pretty quiet for a Saturday morning. The air is not as smokey as it was last night. Looking to the southwest, you can see the smoke in the distance. No sign of flames. That's always a good sign. After listening to the TV yesterday, you were not surprised when you received the AlertSCC notice last night about a possible evacuation and what help the city needed. You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. You think about your immediate next steps: <ul style="list-style-type: none"> Check into the Zone 1 ARK net, let them know you are here. Obviously, you will need help from some of your residents or your local emergency committee.
------------------------	--

	<ul style="list-style-type: none"> ○ Assign a few people to check with all the residents to make sure that they are aware we are all in an <i>Evacuation Warning</i> zone, and what that means. ○ Assign a staff person to listen to Radio Cupertino 1670 on your AM radio for city information. ○ You also start to think about who is going to have problems getting out of here if we actually need to evacuate? <p>Looks like it will be a busy morning.</p>
9:45 Send this message over the next 15 minutes	Your Tactical Call will be Marianist Center. Call Net Control and check in with your call sign and facility name.
10:00 Send this message over the next 20 minutes	You hear that all residents have been notified on the possible activation. Call Net Control and let them know that everyone is aware of situation.
When asked	<p>Wait for Net Control for ask for this information.</p> <p>At some point, you will be asked by the Net Control for two things:</p> <p>(i) the number of residents at the facility by resident class (Independent, Assisted, and Skilled Nursing), and</p> <p>(ii) number of residents who need transport if an evacuation is required (You know the answer is NONE.)</p> <p>If you don't have the actual numbers, make it up.</p> <p>Reply to Control and pass on this information.</p>
10:50 Send this message over the next 20 minutes	<p>With the smoke getting heavier, your management has advised all residents to shelter in place or wear N95 or KN95 masks outside. You are considering moving some of your nursing care residents and you need to know from the City what transport options are available for ambulatory, bedridden, or wheelchair residents.</p> <p>Put a message together and send this question to Net Control.</p>
11:15 Send this message over the next 15 minutes	<p>The Sheriff stops by and you have a brief discussion on what's going on. He says there is a potential that your zone will be set to <i>Evacuation Order</i> within the next 2 hours, but no final decision has been made. You get ready to ask all residents with a car to consider leaving now to avoid the rush. Also,</p> <p>Call Net Control and pass on this information.</p>
11:30	<p>End of the Exercise.</p> <p>Call Net Control and check out of the net.</p> <p>Notify the facility management that the exercise is over and you are leaving. Please thank them for their help.</p> <p>Please proceed to the ICP at Monta Vista ARK to drop off any paperwork you may have created.</p>

Drill Scenario #7

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Post 1 / Stevens Dam
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> 11999 Stevens Canyon Road, Stevens Creek County Park Lat Long: 37.2977579, -122.0798337 Park in the Reservoir Parking area
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. As you arrive, you see 2 county sheriff units and a Cal Fire SUV parked. The Cal Fire Rep has a radio and apparently is talking to a helicopter that's hovering over the reservoir. The Cal Fire Rep later tells you there are already two heavy airtankers, a light helicopter, and a heavy helicopter committed to this fire. The risk of congestion over the airspace is real. The sheriff has his car positioned to block south-bound traffic. You walk over and introduce yourself and tell them why you are there. County Sheriff checks your ID, makes a call on the radio, and confirms your story. From talking to the sheriff, the road is officially closed from south of Ricardo Road, the sheriff is stopping all south-bound traffic to inform them

	<p>of the official evacuation order. He tells you that Stevens Canyon Road is officially closed.</p> <ul style="list-style-type: none"> YOUR TACTICAL CALL IS POST 1.
Send this message over the next 15 minutes	You arrived at Stevens Creek Dam. Check into the Net , then create a brief message letting the EOC know your situation.
10:10 Send this message over the next 15 minutes	A Cal Fire Helicopter is making a water pickup from the Stevens Creek reservoir. The Cal Fire Rep tells you it is a Sikorsky S-64 "Skycrane" and it can hold 1000 gallons of water. Create a brief message to the EOC let them know that Air Operation at the reservoir are in progress.
10:25 Send this message over the next 15 minutes	You are starting to see a steady stream of private cars heading north. All the cars are packed with their possessions. One resident stopped and told you it was very smoky up on the ridge. Create a brief message to the EOC passing on this observation.
10:50 Send this message over the next 15 minutes	You hear the Sheriff on the radio asking for more road barricades. You ask if you can help get the message to the EOC. He says yes, you hand him a message form, and scribbles out the message below. Cool... a third-party message! Send the message to the EOC.
11:15 Send this message over the next 15 minutes	You see 5, 6, no... make that 7 engines heading up Montebello Road. The Cal Fire Rep tells you that they are going to reinforce the eastern perimeter of the fire. Evacuations are required for the residents up there. Create a brief message passing on this information to the EOC.
11:30	The evacuation zone has been expanded and you are asked to leave. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

Drill Scenario #8

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Post 2, Stevens Creek County Park, NWS Field Station
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.
Ref:	https://www.weather.gov/news/imet-article

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> 11450 Stevens Canyon Rd, Cupertino Lat Long: 37.3063708, -122.0747736 After entering driveway to parking lot, drive 400 feet to large parking lot. Park in the Park parking lot near the dumpster. Do a radio check with NCO to confirm radio coverage.
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. YOUR TACTICAL CALL IS POST 2
ON ARRIVAL	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. As you arrive, you see two trucks bigger than C469, one has a satellite dish and a large table with maps spread out. Both trucks are have NWS logos, as do the vests of the two guys nearby. You wonder what these guys are doing here? You approach them, introduce yourself, and learn Dave is an Incident Meteorologist and Mike is a Fire Behavioral Analyst, both from the National Weather Service assigned to support this fire. They are expecting you. They tell you their job is to check the weather situation, verify the forecast is still on track, brief individual response teams, and brief county and local officials as necessary. They are also here to manage the <i>Remote</i>

	<p><i>Automated Weather Stations (RAWS) that they installed around the fire and analyze the ground observations they receive.</i></p> <ul style="list-style-type: none"> • They tell your job is backup comms from them to the ICP.
9:45 Send this message over the next 15 minutes	Notify Net Control you are at your assignment.
10:00 Send this message over the next 15 minutes	Radio comms between NWS and the ICP has been spotty. Dave asks you to just tell the ICP that the last released forecast is valid. Hmmm... Sounds like an official message. You hand him an ICS 213, he fills it out, and hands back (below). Send this message to the ICP.
10:25 Send this message over the next 15 minutes	CAL Fire and the local Air Operations coordinator drives up and is looking for a forecast. They stated that it seemed to be getting gusty up there. Any change in the forecast? Dave checks. Dave asks you to pass their observations to the ICP.
10:50 Send this message over the next 15 minutes	Dave wants to launch a weather balloon, but is concerned about the Air Ops near the reservoir. He asks you to check with the ICP to see if there is any specific time or opportunity, he can launch one? Send this question to the ICP.
11:15 Send this message over the next 15 minutes	Dave comes out of the NWS command truck and does not look happy. He stated that regional weather radar is showing a band of thunder- storms building over the western ridge of the Santa Cruz mountains. Fire crews working in areas with lightening? Not good. He asks you to tell the ICP what is happening and he will deliver an updated forecast to the ICP within 45 minutes. Create and send a message with the facts for the ICP. Write it down if you need to.
11:30	The evacuation zone has been expanded and you are strongly advised to leave. NWS will be staying for another hour. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

Drill Scenario #9

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Post 3 / McClellan Road & Foothill Blvd
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.
Ref:	

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> In the vicinity of 22483 McClellan Rd, Cupertino Park safety on McClellan Road
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. You attended the briefing this morning at 8:30am at Monta Vista ARK and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. At the briefing, it was stated that the City wants periodic car counts, about once every half hour. They handed you a Talley counter. As you arrive, you see 2 county sheriff units and a Cupertino Public Works truck parked there. The Sheriff and DPW crew are apparently talking about road closures and methods to address it. You walk over and introduce yourself and tell them why you are there. County Sheriff checks your ID, makes a call on the radio, and confirms your story. The sheriff has his car positioned to block south-bound traffic. He tells you he is advising any south-bound drivers that the road is closed further on. You ask if you can help. He tells you that Stevens Canyon Road south of Ricardo Road is officially closed. YOUR TACTICAL CALL IS POST 3.

9:45 Send this message over the next 15 minutes	You arrived at the shopping center. You meet up with the Sheriff. Notify Net Control you are at your assignment.
10:00 Send this message over the next 15 minutes	An evacuating resident stops and lets you know that a resident apparently abandoned their livestock. When asked, they had about 2 horses and 6 sheep and they are still up there. Address? 18800 Montebello Road. Sheriff asks if you can send it? You hand him a message form, and he scribbles out the message below. Send the message to the ICP.
10:25 Send this message over the next 15 minutes	A couple hiked out of the County Park and stopped by your area. They stated that it was too smokey back there and heard that evacuations were in place. They also said there was a family down by the base of the dam who seemed to be oblivious of the fire. Not a good place for kids. Send a message to the ICP with this report.
10:45 Send this message over the next 15 minutes	Several residents who evacuated from Stevens Canyon Road have stopped at this shopping center waiting to see if they can return any time soon. They ask if there is any food or water nearby? Send a message to the ICP with this question.
11:10 Send this message over the next 15 minutes	A resident stops by and lets you know that mountain lions are coming down from the hills fleeing the fire. He advises caution for responding teams. Send a message to the ICP with this report.
11:30	The evacuation zone has been expanded and you are asked to leave. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

Drill Scenario #10

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Post 4 / Stevens Creek Blvd & Foothill Blvd
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> 10011 N Foothill Blvd, Cupertino Park in the Parking lot. Move to the awn area outside the office building, on northwest corner Foothill and Stevens Creek
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. At the briefing, it was stated that the City wants periodic car counts, about once every half hour. They handed you a Talley counter. As you arrive, you see a county sheriff and a Cupertino Public Works truck parked there. The Sheriff is stopping all south-bound traffic to make sure they are not going south into the evacuation zone. Public Works is putting out traffic cones and barricades to route traffic. You walk over and introduce yourself and tell him why you are there. County Sheriff checks your ID, makes a call on the radio, and confirms your story. The sheriff has his car positioned to slow south-bound traffic. He tells you he is advising any south-bound drivers that the road is closed further on. You ask if you can help.

	<ul style="list-style-type: none"> • He tells you that Stevens Canyon Road south of Ricardo Road is officially closed. • YOUR TACTICAL CALL IS POST 4
9:45 Send this message over the next 15 minutes	You arrived at the shopping center. You meet up with the Sheriff. Notify Net Control you are at your assignment.
10:00 Send this message over the next 15 minutes	An evacuating resident stops and lets you know that a resident refuses to leave. That person's name? Peter Glock, don't know his exact address, but he lives on Montebello Road just past Ridge Winery. Sheriff asks if you can send a message... you hand him a message form, and he scribbles out the message below. Send the message to the ICP.
10:25 Send this message over the next 15 minutes	A resident pulls over heading north and tells you he has a 90 year old mom at home without portable oxygen. He could not reach 911. Any ideas where he can get help? Send a message to the ICP asking this question.
10:45 Send this message over the next 20 minutes	The Sheriff has been trying to reach Lt Smith at the ICP. He is not sure if he is still there. He asks if you can check if Lt Smith is at the ICP or who is the current Sheriff representative at the ICP? Send this message to the ICP asking this question.
11:15 Send this message over the next 15 minutes	A resident stops by and lets you know that 7 households are blocked from using Stevens Canyon Road for evacuation. Three families are attempting to evacuate on a 3-mile dirt fire road up to Skyline Blvd by horseback. The other 4 families are sheltering in place. Send a message to the ICP with this report.
11:30	The evacuation zone has been expanded and you are asked to leave. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

Drill Scenario #11

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	Post 5 / Temporary Evac Point, Blackberry Farm
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> 22050 Stevens Creek Blvd, Cupertino Park in the Parking lot
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. At the briefing, it was stated that the City wants to direct evacuating residents toward the Temporary Evacuation Point (a place where evacuees will have access to food, water, restrooms, blankets and information about the emergency). YOUR TACTICAL CALL IS POST 5
ON ARRIVAL	<ul style="list-style-type: none"> Reminder: all radio traffic is DRILL TRAFFIC. Please include that statement at the end of each message to Net Control. You arrive at Blackberry Farm. You see several 12x12 tents set up with tables, chairs, and plenty of forms. There is also a Red Cross Cantine truck parked close by... sweet! Coffee and radio... it doesn't get any better than that! You see a person with a Red Cross vest on, walk over, introduce yourself; his name is Mike Masters. You tell him you are his shadow with radio contact with the city.

0945 Send this message over the next 15 minutes	Notify Net Control you are at your assignment.
10:00 Send this message over the next 15 minutes	Mike tells you the TEP is all set up except two things: the most urgent is that they are missing the 3 City Staff that were committed. Can you follow up with the City on where these folks are? Send the message to the ICP.
10:25 Send this message over the next 15 minutes	A resident pulls up with a horse trailer and unloads his horse to graze on a bale of hay. While the resident fills out the TEP paperwork, the horse breaks free, wanders onto the golf course, and starts grazing on the 9 th hole green, much to the dismay on a foursome. Someone spooks the horse and the horse takes off down the 9 th fairway. You will need help with this one. Send a message to the ICP with this situation. Be as brief as possible!
10:50 Send this message over the next 15 minutes	Mike tells you he needs to send a message to the local office. You hand him a ICS 213SF message form, and he scribbles out this message below. Cool... a third-party message! Send the message to the ICP.
11:15 Send this message over the next 15 minutes	A car pulls up and the man reports that his wife (still in the car) went into in labor 45 minutes ago. They have not been able to get through to 9-1-1. Can you help? Send a message to the ICP with this situation.
11:30	What? Moving already? Mike tells you they are moving the TEP to the Quinlan Center. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

Drill Scenario #12

Cupertino
ARES/RACES

The following is provided as general information for your consideration during this drill.

Location	County Fire, Monta Vista Fire Station
General Situation	<ul style="list-style-type: none"> The fire slowed down slightly over night. The cool coastal winds helped keep it from spreading, but as the sun came up today, the sky cleared and the wind began to pick up again. The cell phone network appears to be working, but in some places, it has been overloaded. KCBS is on the air, but not much news on the fire.
Weather:	Weather is current conditions at the time of the drill PLUS Southwesterly winds at 10-15 mph.

The following are the things you observe on your arrival at your assignment. These are things you see and interactions that you have with the people around you.

INSTRUCTIONS: Note the local time or instructions in the left column and pass the message at the appropriate time.

Getting there	<ul style="list-style-type: none"> 22620 Stevens Creek Blvd; Monta Vista Station 77. Park on the street away from the ARK and main fire station garage door.
Local Situation on your arrival... this is what you observe.	<ul style="list-style-type: none"> You attended the briefing this morning at 8:30am at Monta Vista ARK, and learned that only one Cupertino Zone is set for <i>Evacuation Order</i> with several set at <i>Evacuation Warning</i>... hopefully it will stay that way. As you arrive, you see that all the fire equipment is not at the station. You see Battalion 72 (Ford F250 XLT Super Duty 4x4 4-door) and two fire officials by it. You recognize Captain Tim Maguire and Battalion Chief Jon Black talking over a map. You introduce yourself and tell them you are here as Fire Shadow. Batt Chief Black has been assigned to coordinate the County Fire activities in support of the fire. YOUR TACTICAL CALL IS FIRE SHADOW.
09:45 Send this message over the next 15 minutes	You arrived at the Monta Vista Station and met up with your assignment. Contact Net Control and let them know your situation.
10:00 Send this message over the next 15 minutes	Batt Chief Black is talking about a report of a house fire in Saratoga. Cause appears to be from a flying ember. After checking if it is ok to pass that on, create a brief message to the EOC passing on this information.

10:25 Send this message over the next 15 minutes	You are listening in to a Fire Department Briefing. County Fire reports that winds on the fire line are about 5-10 miles an hour out of the South with gusts to 25 miles. Create a brief message to the EOC passing on this information.
10:50 Send this message over the next 15 minutes	Capt Maguire hands you a message (#1). Pass this message to the EOC.
11:15 Send this message over the next 15 minutes	You hear that County Fire Engines 73 and 79 are starting UP ON Montebello Road. Batt Chief Black is in a call with Fire HQ on unit availability to do the same in Los Altos Hills. Create a brief message to the EOC and let them know.
11:30	The evacuation zone has been expanded and you are asked to leave. Create a brief message to the ICP of the situation and then return to the ICP. End of Exercise.

1. Incident Name (Optional):		Priority (E U R):	Message No:
2. To (Name and Position): ICP
